### • *Oral and Maxillofacial Surgery*

One of the largest and most reputable groups of its kind in northern New Jersey, Randolph Oral Surgery is a preferred choice for advanced oral and maxillofacial surgical care. Proud to have earned the confidence of general dentists throughout the region, practice director Dr. Edward Rosenbaum, Dr. Michael Singer, Dr. Tara Plansky and Dr. Gregg Jacob are honored to be selected once again by their peers as *New Jersey Monthly* Top Dentists.

Patients and colleagues can trust this team to handle even the most complex patient conditions. They provide expert care for everything from wisdom tooth extraction to complicated cases involving bone grafting, implants and surgical treatment for facial trauma. With long-term function and aesthetics always top of mind, the group continually strives to create the most positive patient experience possible. One of the most popular services offered is All-

on-4<sup>®</sup>, a same-day procedure that restores a patient's smile by using implants that look, feel and function like natural teeth.

Drs. Jonathan Friedman, Amy Tanchyk, Brian Klein and Jay Kim are part of this prestigious team, which provides around-the-clock surgical care. All procedures are performed in state-of-the-art hospital-style operating suites to meet every type of aesthetic and restorative need. The practice has plans in progress to both expand facilities and increase surgical staff.
